PROFESSIONAL SUMMARY

Developer in training, currently completing the second year of a Higher Vocational Diploma in Cross-Platform Application Development (DAM), with hands-on experience in cross-platform software development, APIs and web scraping. I am especially drawn to backend development, data analysis and automation, where I can apply Python (including Pandas and NumPy) to work with numbers, metrics and processes and to optimise time and resources. After several years studying Engineering, I bring an analytical mindset and a genuine curiosity about how things work. I am looking to join a team where I can add real value with Python while building a solid path towards data-driven work and automation.

TECHNICAL SKILLS

Languages	Python, Java, Kotlin
Backend & frameworks	FastAPI, Spring Boot, React, Jetpack Compose
Data & automation	Pandas, NumPy (Python), web scraping
Databases	PostgreSQL, MySQL, MongoDB
Tools	Git / GitHub, Postman

PROJECTS

REST API · *[Project name]* — FastAPI · PostgreSQL · Python

[One sentence explaining what problem the API solves and for whom]

- REST API built with FastAPI that *[main functionality, e.g. manages X and exposes CRUD endpoints]*.
- PostgreSQL persistence with *[ORM used]* and data validation with Pydantic.
- Auto-generated interactive documentation (OpenAPI/Swagger) and endpoint testing with Postman.
- Version-controlled with Git/GitHub · Repository: *[repository link]*.

EDUCATION

Higher Vocational Diploma in Cross-Platform App Development (DAM) — In progress · Year 2

Code in Place · Stanford University (Python) — Certificate

Backend with FastAPI (Python) — Certificate

Engineering studies — Not completed

LANGUAGES & ADDITIONAL INFORMATION

Languages	Spanish (native) · English C1 (Cambridge)
Availability	Full availability for work placement (FCT) and employment, on-site or remote
Mobility	Driving licence
